1508 22nd St. | Everett, WA 98201

(404)-242-0029 | jrgonewald@gmail.com

Full Stack web developer with skills in JavaScript, TypeScript, React, Express, node.js, and MongoDB. Passionate learner seeking new avenues through which to participate in the creative process. Firmly believe that the experience of users should form the basis of products and services. Interested in storytelling and building platforms from which artists can create and be heard. Constantly finding new ways to contribute to innovative development through a mix of excited curiosity, strong attention to detail, a collaborative attitude, and dedication to clean, efficient code.

Skills

Languages: JavaScript, TypeScript, Python, node.js, HTML5, CSS3, SQL

Frameworks/Libraries: React, Redux, Express, jQuery, Sequelize, Mongoose, Bootstrap, Material UI, Jest

Databases: MongoDB, MySQL, PostgreSQL, DynamoDB

Tools: Git, GitHub, AJAX, npm, RESTful APIs, Heroku, ORM/ODM, jwt, AWS

Methodologies: MVC, Agile Development, OOP, Responsive Design, Authentication, Test Driven Development

Professional Experience

Sky Retro, Atlanta, GA

December 2020 - current

Software Engineering Intern

- Participate in agile ceremonies such as sprint-planning and backlog grooming to generate user stories with accompanying acceptance criteria that drive solutions
- Write unit tests using the Jest library to meet acceptance criteria and guide the solution's behavior
- Develop UX first solutions during weekly sprints while following code quality/Git workflow guidelines
- Solutions include adding new features, maintaining quality UI/UX, debugging, and deploying code changes through the CI/CD pipeline across the full stack of the Sky Retro application

University of Washington, Seattle, WA

September 2020 - current

Web Development Teaching Assistant

- Assist students in learning and applying cutting-edge technologies in the JavaScript environment

Perfect 10 Foods, Atlanta, GA

November 2015 – December 2017

Vendor Coordinator

- Met with brand managers/owners and communicated sales goals/strategies to our sales team
- Managed ordering and inventory levels for all our warehouses while minimizing spoilage/stock-outs

Projects

TrackPacker2 | <https://github.com/jameygronewald/trackPacker2> | <https://trackpacker2.herokuapp.com/>

TypeScript MERN application that allows a user to create an “inventory” of all their outdoor gear and plan “excursions” by adding inventory items to a packing list for each excursion

- Refactored version of TrackPacker, features an updated RESTful API with a service-based architecture built with node.js, MongoDB, and Mongoose ODM, and written in TypeScript
- Created authentication flow with custom middleware, React's Context API, jwt, and bcrypt

Book Keeper | <https://github.com/jameygronewald/bookKeeper> | <https://bookkeeperlibrary.herokuapp.com/>

MERN application leveraging Google Books API to search for books and add/delete them to/from a user's library

- Developed with an emphasis on user-focused design, informed by UI/UX best practices
- Features authentication with protected routes and a RESTful API that works with Google Books API to retrieve dynamic data from user search; allows user to save and edit data stored in user's library

Education

Georgia Institute of Technology, Certificate in Full Stack Web Development

May 2020 – August 2020

- Spent 600+ hours working through the latest programming technologies and applying technologies and concepts to the design, creation, and testing of dynamic web apps
- Built unique apps through utilization of user stories, wire-framing, ERDs, pseudocode, and responsive design
- Worked in collaborative settings using Git, Agile Development strategies, MVC paradigm, and RESTful APIs

Samford University, Howard College of Arts & Science

August 2010 – May 2014

Bachelor of Arts in English with a Minor in Latin American Studies

- Graduated Summa Cum Laude, Dean's List all 8 semesters
